— Parts List —

Nuts (4)

Bolts (6)

Cotter Pins (2)

Air Spinners (3)

Wheel Spacers (4)

Straight Cross Member (1)

Ash Pan Lock (1)

Wheels/Tires (2)

"T" Support Leg (1)

Movement Handle (1)

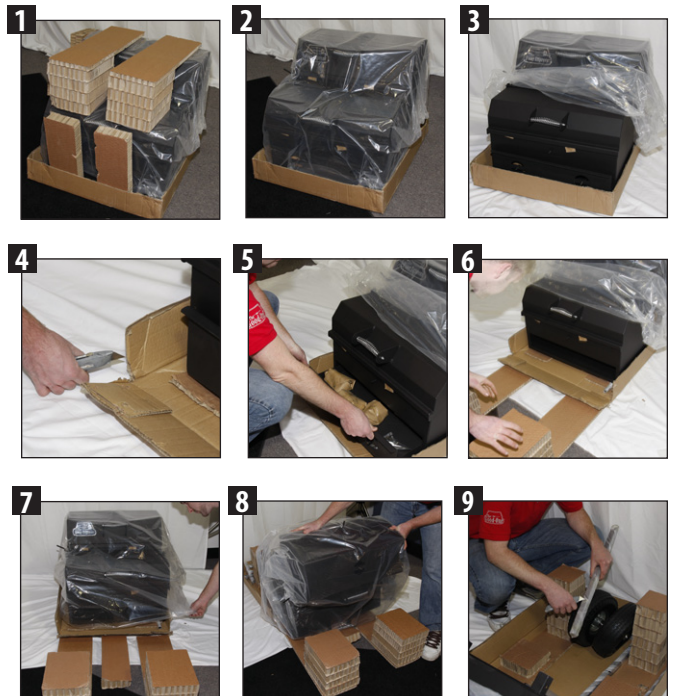

**Tools Required:**

Allen Wrench  
(included)

- Allen Wrench
- Needle-nose pliers
- Hammer

**Preparing Pony Express for Assembly:**

1. Remove box lid.
2. Remove inner cardboard packing and set aside for step #6.
3. Pull protective plastic from front of smoker.
4. Cut corners of bottom box.
5. Remove ash pan/drawer with parts and set aside. Separate and inventory hardware. (Refer to parts list)
6. Place inner cardboard packing, from step 2, and lay in front of smoker & box. (See pics 7 & 8)
7. Replace plastic over smoker.
8. Flip/roll smoker/grill forward.
9. Remove and unpack remaining parts.

---

### 1. Installing the straight cross member support (Requires 1 Bolt):

---

- a. Lay out the leg support with long-leg on the right.
- b. Lift so long leg is up and locate pre-drilled holes.
- c. Align straight cross member into the square with pre-drilled hole on leg support.
- d. Insert bolt and hand tighten. **Do not tighten completely.**

---

### 2. Installing T-support leg:

---

- a. Lay flat with straight cross member facing up.
- b. Insert T-support leg and attach with flat side up lining up with the pre-drilled hole.
- c. Insert bolt and attach nut using Allen wrench. **Do not tighten completely.**

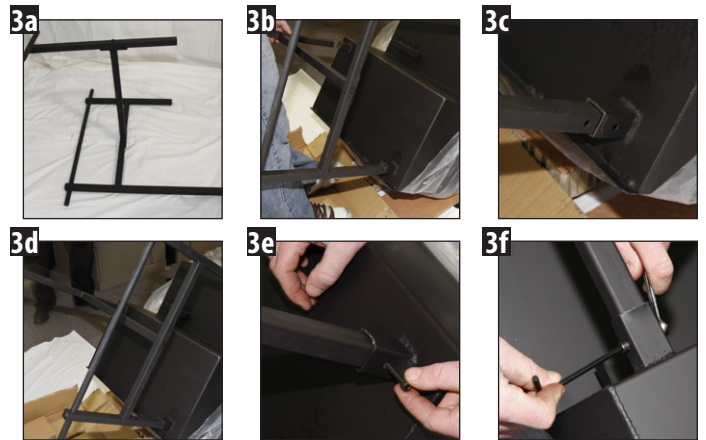

---

### 3. Attaching support leg stand (Requires 3 Bolts & Nuts):

---

- a. Align and insert the straight cross member into the square brackets on the bottom of the smoker/grill aligning with pre-drilled holes.
- b. Align legs with brackets at bottom of smoker body.
- c. Locate the pre-drilled holes.
- d. Align support legs with pre-drilled holes and insert bolt.
- e. Attach nut and tighten using Allen wrench & pliers. **Repeat on all supporting legs.**
- f. Revisit leg bracket/support assembly and securely tighten all screws/bolts.

---

### 4. Installing the Movement Handle (Requires Bolt & Nut):

---

- a. Slide handle into placement bracket. Assure pre-drilled hole is beyond placement bracket.
- b. Insert bolt & nut and tighten using Allen wrench.
- c. Tighten securely to prevent handle from sliding out.

**Note: At this time, tighten ALL bolts on leg unit with Allen wrench & pliers.**

---

### 5. Attaching wheels (Requires 4 wheel spacers & 2 Cotter pins):

---

- a. Place two wheel spacers onto axle.
- b. Place tire with stem facing outward.
- c. Insert cotter pin to secure wheel
- d. With needle-nose pliers, bend ends of cotter pin outward.
- e. Repeat on other side.

---

## 6. Moving Pony Express into upright position (CAUTION: Two people recommended)

---

- Lay the smoker flat.
- With a person on each side, NOT HOLDING HANDLE, place in upright position.
- Remove plastic and wipe away any oil or residue that may seep out from shipping with paper towel.

---

## 7. Installation of Ash Pan Lock

---

- Open Firebox Lid (bottom lid) & ash pan/drawer.
- Insert the ash pan lock and turn in a clockwise direction about 6 times to secure ending with rounded edge on top.
- Insert ash pan/drawer.
- Turn ash pan lock to the right into a locking position.  
**Note: It may be necessary to jiggle the drawer somewhat to get lock into position.**

---

## 8. Installation of Air Spinners

---

- Locate the bolt, located on top of the lid and insert a spinner and turn in a clockwise direction about 10 times to secure.
- Locate the bolts on the front of ash pan and insert spinners and turn in a clockwise direction about 10 times to secure.

---

## 9. Installation of thermometer/nameplate

---

- Remove fitting from thermometer stem and locate the pre-drilled hole on the right front-side of the smoke box (upper lid)
- Insert stem into pre-drilled hole. Secure with the fitting from the inside of the smoke box lid.
- Remove protective plastic film from smoker/grill nameplate.
